

Circuit Court Management System
CCMS(w) for Windows Technical Bulletin

CCMS Update
W02.25 – 2.00.00X0

Enhancements

Check Writing

Provided a means to change the “P aid” flag for an existing receipt. Please call for an administrative password to allow this function.

Daily Financial Reporting

Added a Credit Card subtotal that reflects a negative amount so it is not included in the daily deposit amount.

Unpaid Receipts

Automatically places a “P” in the credit card fee “CRD” during the receipt process and omits credit card convenience fees from the reports.

Check in/out sub system

The new sub system allows a bar code label to be created for each new case filed, the label is attached to the case file, and later scanned during the check in / check out process. This sub system tracks who and when a file was checked out. The system displays who has the file checked out on screen 2 of CCMS. It also provides the ability to list the history of who had checked the file in and out. A dymo printer and wedge reader may be required to make this sub system fully functional.

Call for pricing.

Credit card processing

Added the ability to accept credit cards during receipt processing. Complies with the legislative rules. Free installation.

Added e-mail: to the Attorney Master File.

Statistical Report: added a feature to speed up processing of this report.

Image Viewer can now be forced to open documents in Adobe Reader or Acrobat rather than CCIS Image Viewer

Added a feature to allow docket entries to be resequenced by date:

This is accomplished by pressing an "R" while on Screen 4. This feature is disabled by default. Call support if you wish to have this feature enabled.

Screen 3 Event comments Added an extra comment line.

Pro Se report can now print a detailed report which includes the case number..

Statistical Report changed the case selection to use Date Filed instead of Indictment Date on Criminal Cases.

Word Processing Merge

Corrections

Image Viewer was modified to give the ability to remove an extra popup that asks: "delete a line", "scan legal size" or "scan regular" and instead goes straight to scanning.

Docket Screen a line numbering issue was resolved

Inquiry Program Removed a rogue letter "T" that appeared in the top right of screen 4.

Inquiry Program resolved program termination when selecting "Case by Date Filed"
